

Upper Owyhee Watershed Assessment

Appendix E.

A non exhaustive list of plants identified in the upper Owyhee subbasin with species names, common names, and source of information.

© Owyhee Watershed Council and Scientific Ecological Services

Although a species is not listed in the following table, it does not indicate that the species is absent from the upper Owyhee subbasin. The species included here are those that have been positively identified as being within the subbasin. There are undoubtedly numerous species which have been omitted, particularly since the personal observations were mostly made following the flowering season for most of the wildflowers so that they would not have been very obvious.
